Company Profile

Founded in 1991, Nanfang Pump Industry Co., Ltd. (hereinafter referred to as CNP) has been listed on the Shenzhen Stock Exchange on 9th December 2010; Stock name: CNP; Stock code: 300145.

As the first enterprise specializing in the research and large-scale production of stainless steel stamping welded centrifugal pump in China, CNP is currently the professional manufacturer with the highest volume of production and marketing in that industry. It ranks first in the country in terms of product scope, sales volume, and production quality. The company has set up a complete network of marketing services to meet the requirements of overseas markets as well as domestic needs. The products have seen a wide range of application in the area of pressurization, industry, living water, cycling of air-conditioning water, heat supply, fire extinguishing system, pumping of underground water, treatment of sewage and waste water, chemical industry and desalination of sea water etc.

CNP has now entered into the fast track of development and has taken a major step forward in forging China Strong Pump Enterprise and World's famous brand in the Pump Industry. In order to better meet the client's needs and requirements for expansion, it has set up a wide network of selling and service, as well as offices and service centers in major cities in China, which are aimed at providing timely and effective services for our clients. Meanwhile, our company has successfully penetrated into the world market by forging a good business relationship with more than 50 countries and regions in the Europe, Northern American, and Southeast Asia etc.

● Introduction

ZS Stainless steel horizontal single-stage centrifugal pump is made by advanced techniques such as pressing bulging welding of corrosion resistant plate. It is a new generation centrifugal pump initiated in China and may replace traditional IS pump and common corrosion proof pump. It features beautiful appearance, light and handy structure, high efficiency and energy saving, durable, corrosion proof, low noise, etc.

● Definition of model

● Application

ZS Stainless steel horizontal single-stage centrifugal pump is a sort of multifunction product with wide application. It may transmit various mediums including water or industrial liquid and is suitable for different temperature, flow rate and range of pressure. Its typical application mainly includes the following aspects:

- Water supply: filtration in water works, transportation and subarea water carriage, pressurization of main duct;
- Industrial pressurization: flow wetting system, cleaning system;
- Transportation of industrial liquid: water supply of boiler, condensed system, cooling and air conditioning system, machine tool support, light acid and alkali transportation;
- Water treatment: distilled water system or separator, swimming pool, etc.;
- Farmland irrigation, medicine and sanitation, etc.

● Minimum inlet pressure NPSH

In case that the pressure in pump is lower than the steam pressure used to convey liquid, the cavitations will occur. To avoid cavitations, a minimum pressure at the inlet side of the pump shall be guaranteed. The maximum suction stroke can be calculated with following formula:

$$H = Pb \times 10.2 - NPSH - Hf - Hv - Hs$$

Pb – Atmosphere pressure (bar)

In a closed system, Pb means system pressure (bar)

NPSH – Net positive suction head (m)

It can be read from the point of Max. flow rate shown on NPSH curve.

Hf – Pipeline loss at the inlet (m)

It is in accordance with pipeline possible Max. Flow.

Hv – Steam pressure (m)

It depends on liquid temperature and steam pressure value.

Hs – Safety margin (m)

Minimum 0.5m delivery head.

If the calculated result H is negative, the pump may run under the Max. Suction head H. In case the calculated result H is negative, a delivery head of Min. Inlet pressure is necessary.

Note: Normally, the above calculation will not be done. H is calculated in the following conditions:

- 1、 The liquid temperature is comparatively higher;
- 2、 Liquid flow exceeds rated value;
- 3、 Suction head is comparatively large or inlet pipeline long;
- 4、 System pressure is too low;
- 5、 Bad inlet condition.

● Installation requirements

The shaft connection type of ZS pump is direct connection. The pump is composed of pump, shaft and standard motor.

- The pump shall be installed on the ventilating and anti-freezing place;
- The installation of the pump shall ensure that the pump will not be forced by the tension of the pipeline;
- If the pump is installed outdoor, suitable outer cover must be used to prevent electric elements from water inflow or coagulating dew;
- To facilitate inspection and maintenance, enough space must be left around the machine group;
- Electric wiring device shall guarantee that the pump will not be damaged by lack of phase, unstable voltage, current leakage and overload;
- The pump shall be installed on the base horizontally. Horizontal direction is the inlet for the pump, and vertical direction is the outlet for the pump;
- The flange connection dimension are in conformity with the related provisions PN16 in GB/T 17241.6 or ISO7005-2/DIN 2501.

● Curves

Following conditions are suitable for the performance curves shown below:

- 1、Curve tolerance is in conformity with ISO9906 Annex A;
- 2、All curves are based on the measured value of motor 3×380V, 50Hz; under the constant speed of 2900rpm or 2950rpm; 60Hz;under the constant speed of 3450rpm or 3500rpm;
- 3、The test medium is clear 20°C water without any solid impurity;
- 4、Pumps should not work if the flow is beyond the minimum or the maximum flow in the curves;
- 5、The motor power shall be adjusted if the viscosity or density of medium is different from water.

● Operating condition

- Clean, thin, non-flammable and explosive, not containing the liquid with solid particle and fibre;
- Liquid temperature: -20°C ~+100°C ;
- Ambient temperature: up to +40°C ;
- Altitude: up to 1000m;
- Max. pressure of the system is 10 bar.

● Motor

- TEFC motor, 2-pole;
- Protection class:IP55;
- Insulation class :F;
- Standard voltage:50Hz 1×220V
3×380V
- Standard voltage:60Hz 1×220V
3×220V
3×380V
3×460V
